

*South Windsor, CT – May, 2018* – Meyer Gage has announced the successful transition to ISO 9001:2015 with the scope of “**the manufacture of precision fixed limit gages for use in Aerospace, Medical, Automotive, Electronic and Metal Working Industries**”. Certified by ASR American Systems Register, a world leader in certification activities, for all of its South Windsor facilities. The certification attests that Meyer facilities meet the internationally accepted standards of quality assurance in its management, manufacturing and service procedures.

James Meyer President and John Meyer Vice President enthusiastically announced the certification to their employees. “We have always had a great system in place of comprehensive documentation for procedures, practices, forms, drawings, and similar controlling documentation that affects product quality. It’s gratifying to see our processes adapted to international procedure standards.”
